

Van Der Graaf Generator, Ferret And Featherbird

Time has come between us
In the passing months I've felt you slip away
As your words and mine came like nursery rhymes
Till there was nothing left to say

Distance came between us long ago
As our memories faded away
Over the miles I ceased to smile
Because nothing seemed the same

That's how it seemed a week ago
Far off in time and space

Time and distance are only thoughts and words
Conspiring to break up our minds
They're quite unreal, tell me how do you feel?
Look inside your head and tell me what you find

Time and distance, yes they're between us now
And they form a bond to make things sure
Nothing ever shatters, you know what happens
Time and distance make a love secure

Well nothing ever shatters, you know what happens
Time and distance make a love secure
