## Van Morrison, Lifetimes

(Van Morrison)

You sit in silence And the river answers And I have loved you many, many years I saw you standing by the wonderous river And I have come today To calm your fears

Those lifetimes So many lifetimes With you

The boatman singin' far across the water What is this feelin' in my heart and soul The nighttime angel spreads her wings around me And I feel the sadness And the river flows

Those lifetimes So many lifetimes With you

Listen to the music inside
That is all that you have to do
Listen to the music inside
Can't you hear what it says to you

And I shall get to know you In these lifetimes In awe and wonder On down through the years The nighttime angel spreads her wings around me I feel the silence And my doubts are cleared

Those lifetimes So many lifetimes With you

Listen to the music inside
That is all that you have to do
Listen to the music inside
Can't you hear what it says to you

Listen to the music inside That is all that you have to do Listen to the music inside Can't you hear what it says to you
