

Vanbot, The Way You Say It

At first, were friends
It's sweeping love, all the dust in this house
Rocks turned into sound
Before I felt something pushing me out

Breathing thin air
It feels like I'm waking up for the first time

It's the way you say it
It's the way you say it, you say it
All my walls come tumbling down
It's the way you say it /3x

Something begins
Revealing the secrets that never solite
My head is drunken
I gave in towards the light I used to fight
It's the way you say it, you say it
All my walls come tumbling down
It's the way you say it /10x
All my walls come tumbling down
It's the way you say it

I let the night come close 'cause I know you'll sleep the day
I let the night come close 'cause of all the things you say
