

# Vanden Plas, We're Not God

Music: S.Lill

Lyrics: A.Kuntz

New techniques based on plasmid transfer now make it possible  
possible to determine  
exact nucleotide sequences of isolated sections of the dna  
when we raise clones  
that's what we do  
the thread of life is a threat of life  
so what are we  
we  
we are  
we are not  
we're not god  
creature  
we've raised in laboratories  
on base ephemeral  
input keylock principal  
genemachine you'll never know what you can do  
protection of the rich ones  
surveillance of the poor  
so what when we raise a secret mushroom that we can't control  
when we raise clones  
that's what we do  
the tread of time is a dread of life  
so what are we  
we  
we are  
we are not  
we're not god  
brand new breed based on plasmid transfer now make impossible  
possible to determine  
insane nucleotide frequencies  
eliminated  
selection of the dna  
when we raise clones  
that's what we do  
the thread of life is a threat of life  
so what are we  
we  
we are  
we are not  
we're not god
