

Vanessa Williams, First Thing On Your Mind

A little more giving
A little less take
A little more time
To bend so we don't break
A little less anger
A little less pain
A little more love
Could surely stop the rain

If you asked me if I thought
That you loved me I'd say I know it
But sometimes I need you to show it
So baby

[Chorus:]
Kiss me when you get out of bed
Say the words that never get said
Loving me should always be
The first thing on your mind
Tell me what I already know
Hold me like you'll never let go
Loving me should always be
The first thing on your mind

A little more laughter
A little less tears mhh
A little more compromise

To see us through the years
A dream is the making
A place of our own
A little more give and take
Will make a happy home

If you asked me if I thought
That you loved me I'd say I know it
But sometimes I need you to show it
So baby

[Chorus]

Give all you have to give
Never save a lovin for another day
If you believe in this
Never save a lovin for another day

Yeah yeahyeahyeahyeah

Hold me yeah yeah
Oh baby love me, oh yeah
Loving me should always be
The first thing on your mind

Love me, you better hold me
Loving me should always be
The first thing on your mind
First thing first thing on your mind

Yeah yeah

[Chorus 2x]
