

Vanilla Sky, Xmas Girl

Even though the Christmas night
Is coming I can't feel fine
Everywhere it's full of lights
Reminding me the best December
And the weeks we spent together
watching every single glass
looking for the right presents
to complete my Christmas list

But now I miss something
Or should I say that I miss you
And all those small things

You came out from my mind
I only feel like I'm satisfied
When you're here with me
I'm lost without you by my side
Even in the Christmas night
I need you here with me

Even though the Christmas night
Is coming I can't feel fine
Everywhere it's full of lights
Reminding me the best December
And the nights we spent together
watching every single star
thinking about the right present
to complete my Christmas list

But now I miss something
Or should I say that I miss you
And all those small things

You came out from my mind
I only feel like I'm satisfied
When you're here with me
I'm lost without you by my side
Even in the Christmas night
I need you here with me, with me

But now I miss something
Or should I say that I miss you

You came out from my mind (from my mind)
I only feel like I'm satisfied
When you're here with me
I'm lost without you by my side (Christmas night)
Even in the Christmas night
I need you here with me, me, me...
