VanVelzen, I'll Stand Tall

Life has run you over
Life keeps putting you down
All the weight on your shoulders
Leaves you to stare at the ground

You are in over your head
Don't see much of the sky
But I know you should know
Just look up when you're low
We'll spin this around
I can hear you call

Chorus:
When you fall
I'll rise and make you whole
I'll stand tall
You'll be safe and sound
Miles above the ground
I'll stand tall and make you high
Give you wings and make you fly
When there's no way out at all
I'll stand tall

Drive it out of the slow lane
Speed things up to your pace
There might only be four walls
You need a map of the maze

I can see that you suffer
But in time you will see
There's a new way to go
Just look up when you're low
We'll spin this around
I can hear your call

Chorus

When you fall
I'll rise and make you whole
I'll stand tall
You'll be safe and sound
Miles above the ground
I'll stand tall and make you high
Give you wings and make you fly
When there's no way out at all
wooohoho
wooohoho
wooohoho
wooohoho
