

Varius Manx & Kasia Stankiewicz, BREATH (feat

it's been a long time
I still feel the ice
slowly melting now
there's no mountain high enough

look around
sing what you see
you got to lose to know
how to be the one you want

I'll be waiting for you
looking for this precious feeling
you have inside
run as fast as you can
no one want you lose
put on your smile
I'll be waiting for you
looking for this precious feeling
you have inside
run as fast as you can
no one want you lose
put on your smile

take a little breath
will be better I swear
it just take some time
you're in the middle of the ride

look around and
sing what you see
you got to lose to know
how to be the one you want

I'll be waiting for you
looking for this precious feeling
you have inside
run as fast as you can
no one want you lose
put on your smile
I'll be waiting for you
looking for this precious feeling
you have inside
run as fast as you can
no one want you lose
put on your smile
