

Veda Hille, One Inch Of Lichen

There are bushes that grow in trees!
Bears stand on hind legs!
Flowers that you've never seen!
Coral bones! In river beds!
Bonds form between people!
People become friends!
One inch of lichen in one hundred years!
Falling rocks! Just miss your head!
Higher than you've ever climbed
People! Stick real close together
Any second you could die
People disappear forever, people disappear forever....
Have you ever felt so damply cold?
Have you ever felt so alive?
Have you ever felt exclamation points so ridiculously uncontrived?
Bonds form between people.
People become friends.
Mountains disappear in fog!
Headaches! Leave your head!
Climb aboard the helicopter!
People! Keep your heads down low!
We can talk about it later
Now we're going here we go here we go here we go
Higher than you've ever climbed!
People! Stick real close together!
Any second you could die!
People disappear forever, people disappear forever, forever, forever.....
