

# Velcra, Removed

Put your hand in mine my little girl  
Out of the January hallway turn  
Walk on the sun with me my little girl  
Watch the shadows burn out of this world

Unarmed, the enemy is white and smiling  
Lulling, I forgot to defend  
Master of persuasion in the name of reason  
Stretched my lifeline, stole the apple of my eye

To think that there's no other way was such a big mistake  
I pay it every day cause it's getting under my skin  
You told me there's no other way but you were wrong  
Now it's getting under my skin  
And I can't go on

Just the two of us my little girl  
Lost in the corridors of this cruel world  
Daddy's tired now my little girl  
No sign of home no matter where we turn

Vaporised, this dead deserted paradise  
Is crumbling under my feet  
Like my flesh and blood reduced to ash and dust  
Burn marks reminding me of all I've lost

You told me it's alright  
I hope you can stop this bleeding

Bubbling under my skin  
I hear the devil within  
Corrupted fruit I kept eating
