

# Velvet Acid Christ, Disflux

fucking lie, your fucking lie  
you'll fucking die, now fucking die  
it's your state, your state, your physical  
your mental state  
your state, your physical, your mental state  
into lights, you will fall into  
you will redefine, you will count the line  
no reason why, no reason why  
to crawl away into your dream state  
another way to get away  
zero, zero reality  
you'll melt away, you melt your words  
try to tell me right and wrong  
no fever in your eyes, no burning  
now they work, they live they play  
they die in shame  
they die in shame  
they die in shame  
disearned course, insciety  
we'll redefine almost everything  
overthrow the virgin mind  
you can't hypnotize, you can't hypnotize  
paralyzed, hypnotized  
emulsified with treacherous crimes  
fallen states will copulate  
now for your eyes, retarded life  
broken up into four words  
fuck off and die, fuck off and die  
realize the look in my eyes  
try to relate to this broken waste  
desire is misfortune, lust is rust  
creating the plague
