

Vent, Numb

You feed to know
Just how she feels inside
You grip her throat
She begins to cry

When you tear she will bleed more
You don't care that she's screaming
She was infected
When will her pain go numb?

It hurts to know
It hurts to know inside

It won't go
The pain will never die

When she sleeps
She will feel you
As she sleeps
She will see you

You don't seem to listen to screams
So why don't you listen to me?
No is all no will ever mean
