

# Veonity, Guiding Light

We are evacuated

I saw the end. I lived it all  
When mother Gaia died  
I travelled far and heard the call  
And now it's time to rise

A deadly realm where darkness reigned  
And a rose about to die  
My heart was filled with heavenly rage  
This time I will not fail

I will never leave your side  
The voice that your hear is mine

Come with me far beyond this hell  
Together we will stand, we're invincible  
Look to the stars, I'm the shining light  
That shows you the path and guides you back home

They came in peace to bring you all  
Inventions from beyond  
But they tried to change your ways of life  
And cast your gods aside

As time went by intentions changed  
They wanted to dominate  
With weapons forged in astral flames  
They tried to end our race

I will never leave your side  
The voice that your hear is mine

Come with me far beyond this hell  
Together we will stand, we're invincible  
Look to the stars, I'm the shining light  
That shows you the path and guides you back home

The light that will guide you home  
Shining on you forever

Will you see it now, will you find the way  
Out of the darkness and into the light  
Can you hear them now, how they call your name  
Warcries of Asgard echoes through the night

Deep inside my heart you are still alive  
An inner peace that's guiding me  
Deep inside my broken heart  
I still believe that you and me are destined to be set free

I will never leave your side  
The voice that your hear is mine

Come with me far beyond this hell  
Together we will stand, we're invincible  
Look to the stars, I'm the shining light  
That shows you the path and guides you back home

I will never leave your side  
The voice that your hear is mine

Come with me far beyond this hell  
Together we will stand, we're invincible

Look to the stars, I'm the shining light  
That shows you the path and guides you back home

Come with me
