Verena, Heartbeat

I can feel the need, I can feel the heat my heart in sync with you on every beat forget about the time, day turns into night waiting for the chance to get it right take me where - I don't have any care.. waiting for a sign - time just passes by you were weant for me - I don't know why if you say the word - there's nothing I won't do touch me once again - the hole night through you can stay `till the break of day if it's good enough for you it's good enough for me take me to the top - then set me free I just wanna feel your heartbeat just wanna feel your heartbeat love is like a wave takes me for a ride higher as i feel the risig tide I just wanna feel your heartbeatl just wanna feel your heartbeat when I think about the times I've spent with you how the days went by - they seemed so few if we try again - I` II forgive the past you will be my strength - we'll make it last Í feel free - you`re lyin` next to me prayin` in the night - begging` through the day hopin` that you say your`re here to stay I don't wanna loose you, I don't wanna fight I just wanna have you by my side trust in me - and baby you`re gonna see... if it's good enough for you it's good enough for me take me to the top - then set me free I just wanna feel your heartbeatl just wanna feel your heartbeat
