

Vergeltung, Gravitational Phantom Of Deceased

Gravity waves... distorted space
Black holes consume the very time
The sideral core shrinks
beyond the none
Absorbing quants of light

Mind over metter...
Light over mind...
Time over light...
Dark over time...

Myriads of dimensions are
Scoped under veil of xaos
Time is strayed out of boundless
Infinity of universe
Once they'll collide...
Once space will burst
next to nova
