

Vertigo Angels, Illuminated

hurt me you know what things to say
and somehow these things they pass and fade
but knowing the way you were before us
and seeing the way that you were before us
and knowing the way that you were before us
and if i get my way
just stay always don't you go no please
just stay always illuminated
somehow when everything's turned black
my mind spins she's pulling me right back
but knowing the way you were before us
and seeing the way that you were before us
and knowing the way that you were before us
and if i get my way
just stay always don't you go no please
just stay always illuminated
just stay always don't you go no please
just stay always illuminated
illuminated what you believe in
it's okay it passes anyway
illuminated what you believe in
just stay always don't you go no please
just stay always illuminated
just stay always don't you go no please
just stay always illuminated
