

# Victoria Adams, Every Part Of Me

People always talkin bout people always run their mouth  
But when I hold you there's no doubt my love for you is true  
Before my life was ups and downs and happiness I used to chase around  
That's why I'm glad you came cos now there's no substitute

And I don't care whatever may come our way  
Its you and me forever and ever to be cos..

When I look at you I see me from my head to your toes every part of me  
And everything you do I did too cos I'll always be a part of you  
When I look at you I see me from my heart to your soul I'll always love you so  
And everything I do you'll do too cos your every little part of me

I've seen how easy things can change and people never stay the same

But baby ever since you came you made me feel secure  
Yes I think you should know that people gonna come and go  
Be assured of this one thing I will still remain

And I don't care whatever may come our way  
Its you and me forever and ever to be cos..

I know that there will come a day when you have to go away  
But you have no reason to fear I promise I'll be here  
If someone ever breaks your heart and you feel your world is torn apart  
My love for you will bring you through hard times  
I'll help you be strong

Chorus out
