

# Victory, She's Back

I've seen the north side of heaven  
I've lived the south side of empty hell  
Black days and bluer nights  
I couldn't hide in the spotlight  
Got an angel's smile  
With the devil's guite  
She's back, she's back back in town  
The best thing that's been around  
She's back, she's back back in town  
Back in town  
I've seen her legs in my dreams  
I've seen her face in magazines  
White heat and red lights  
A one-way street through the dead of night  
Got an angel's smile  
With the devil's guite  
Won't you thrill me - Chill me - kill me  
She's back, she's back back in town  
The best thing that's been around  
She's back, she's back back in town  
Back in town  
She's back, she's back back in town  
The best thing that's been around  
She's back, she's back back in town  
Back in town  
She's back, she's back back in town  
The best thing that's been around  
She's back, she's back back in town  
Back in town, back in town  
She's back
