

Ville Valo, The Foreverlost (VV)

We'll never run out of moons to howl to
Between the shadow and shade of love
Here's to the pouring rain a-ha
[?]

With those [?] highs
To this melodic momento
Of the mourning kind

Suicide by love's night vision heart
I don't wanna die but I can't stay
Forever, the foreverlost
Forever lost in you
Forever, the foreverlost
Forever lost in you

We keep whistling the devil's tri-tone past
The necropolis of love in the dark
Here's to night eternal a-ha
Nyctophile Shangri-la
No stop Finnish roulette of the heart
Of midnight [?] baby

Moondial it up, sundial it down
Dance the decay on the haunting ground
Moondial it up, sundial it down
Come dance the decay now and then down

Suicide by love's night vision heart
I'm not ready to die but it's getting late
Forever, the foreverlost
Forever lost in you
Forever, the foreverlost
Forever lost in you
Forever, the foreverlost
Forever lost in you
Forever, the foreverlost
Forever lost in you
Forever, the foreverlost
I am forever lost in you
I'm forever lost in you
Forever lost in you
