

Vio-Lence, Subterfuge

Deceiving face fits perfect like a glove
In the camera eye of this world
A pocket lie, a don't know why
Subterfuge works on you!

A major voice, forked in an eastern block
States what is true is what you've heard
But what they've heard is slightly blurred
Subterfuge works on you!

I don't know, become I forgot
In a covered statement to our press,
Protect the man, his shining hand
Subterfuge works on you!

Feeding fool public, have a taste and swallow
Just what they've pasted to you
Convict them not, deception walks
Subterfuge works on you!

Malignant, infected, disease of two face
Public elected, and put into place
Virus detected!

Most are dumb, and often easily fooled
By the blinding statements that you make
I'm not their kind, I see you fine
Subterfuge, works on you!

Open your mouth, and stupid comes out
And it's often followed by a prayer.
Forget them god, their intentions are marred by
Subterfuge, don't work for you!

Malignant, infected, disease of two face
Public elected, and put into place
Virus detected!

Malignant, infected, disease of two face
Public elected, and put into place
Virus detected!
Malignant, infected, disease of two face
Public elected, and put into place
Virus detected!
