

Virginia Coalition, Meteor

Who knew that fate was so sublime
It's not a remedy
But it keeps the embers of the fire burning strong
Though the days and the weeks grow long
Oh you can be comforted by just how profound
And we'll be fine in all we see
The path we choose is destiny

Meteor Calypso
Find it everywhere you go
I seen it all but I been so
You gotta know what you're lookin' for
And every little way you go
It's all you know you're a meteor

Maybe you wrote down your name in the sand
Well I've seen better
Plant your heels in the ground
Waitin' patiently
You were carved in a mountain
A penny in a fountain bowl
That dried alone
And know you've seen silver wings
And so much faster things
You need a dream to fly
Not some paper airplane

Meteor Calypso
Find it everywhere you go
I seen it all but I been so
You gotta know what you're lookin' for
And every little way you go
It's all you know you're a meteor

Why don't you ride on
Why don't you ride on
Why don't you ride on

Let it be said that these two
Felt the awesome power
And the tragedy
Of a love so real that
Only they could feel
Waiting patiently
They drifted apart and then together
Like words uttered by lovers
Do you think that I'd lie to you
Whoa, that's something I would not do
Gonna move that way forever
Just like a

Meteor Calypso
Find it everywhere you go
I seen it all but I been so
You gotta know what you're lookin' for
And every little way you go
It's all you know you're a meteor

Why don't you ride on
Why don't you ride on
Why don't you ride on
