

# Virginia Coalition, Voyager 2

I hear you clearly  
Though you're hardly in my view  
For I'll listen in the way in which you told me  
Hold them nearly, all these murmurs of the earth  
Pushing forth white waves when something hits the water  
And all directions, they point inside of you  
And all connections, to life beholding  
The pebble in the puddle made the ripple in the water  
Made the tree casting shadows on the river through the swaying limbs I see  
Voyager 2, you're leaving together  
Send help soon  
And I've seen spirits and children all waiting, waiting for you

You draw closer now with a message held within  
From all who gazed into the sky in silent wonder  
What a number, the living and departed  
For people all alone forever searching for an answer  
Almost screaming to be heard  
Modern words confusing their own need to listen  
Spirit foresee endless course of aboriginal direction  
Answer prism, resurrection, the earth, the child, the sun  
And the stars we see

Voyager 2

You're leading the rescue

Send help soon

Well I've seen spirits and children all waiting, waiting for you

They're all waiting for you

And so with patience, and the deepest fascination, I greet the day we'll somehow be together. Then

And all directions, they move inside of you

And all connections, the life beholding

The pebble in the puddle made the ripple in the water

Made the child sleeping soundly by the river
