

# Viva Voce, When Planets Collide

When I think about you I can barely breathe  
There's a velvet wave that crashes over me  
When I think about you I can barely breathe

When I see you, the stars melt away in the sky  
There's a powerful feeling when the planets collide  
When I see you, the stars melt away in the sky

Inside. I know. My heart tells me it's so.  
The light. The heat. Illumination complete.

Inside. I know. My heart tells me it's so.  
The light. The heat. Illumination complete.
