

# Voice Of The Beehive, Scary Kisses

there's not much of a trick to playing safely baby  
people do it every day  
you can see them living sensibly with lots of care  
lonely in a cautious way

you be alone for me  
i'll be alone for you  
one and one people alone make two  
let's stir things up a bit  
throw the pieces up to the sky

baby i want scary kisses  
i want hits and i want misses  
i want hell and i want bliss  
and that stuff between it  
and you gave me safety and  
the showtime all that drove me crazy  
i would rather run and fall then take no chance at all  
then take no chance at all

i would rather sit here by myself  
then settle down with someone safe and sound  
i kinda like a little trouble every now and then  
someone with enough to break ground

you take a look for me  
i'll take a look for you  
we'll find it's not so bad it's just new  
let's stir things up a bit  
throw the pieces up to the sky

baby i want scary kisses  
i want hits and i want misses  
i want hell and i want bliss  
and that stuff between it  
and you gave me safety and  
the showtime all that drove me crazy  
i would rather run and fall then take no chance at all

and if we break or if we bruise  
it wont be the worst of news  
we will just get up again start over on the count of ten  
and if we scar or if we break  
it will be our own mistake  
put it down to what we know  
then have another go

and take another chance  
and just begin again  
run your finger through the flame  
and i will do the same  
together we will fall  
together we will rise  
together we will do everything  
but compromise

baby i want scary kisses  
i want hits and i want misses  
i want hell and i want bliss  
and that stuff between it  
and you gave me safety and  
the showtime all that drove me crazy  
i would rather run and fall then take no chance at all

and if we break or if we bruise  
it wont be the worst of news  
we will just get up again start over on the count of ten  
and if we scar or if we break  
it will be our own mistake  
put it down to what we know  
then have another go

baby i want scary kisses  
i want hits and i want misses  
i want hell and i want bliss  
and that stuff between it  
and you gave me safety and  
the showtime all that drove me crazy  
i would rather run and fall then take no chance at all
