

# Voivod, Nuclear War

Fast and pure desolation  
Lust the blood in my brain  
Hard and dry destruction  
Wet under the neutron rain  
Die in this Holocaust  
Scream the deflect attack  
Burn before we reload  
Streets before...  
The power blast  
WAR! A command for blood  
We scream  
DIE! Nothing less than  
death we creep  
Storm the only weather  
Start the directives assassins  
Warm inside the under shelter  
Wait and feel your broiling skin  
Hot or one disappear  
Blight in the atomic detention  
Rats it's a survival breed  
Destroy with deflagration  
I have one track it's to kill  
You'll never stop me  
Running my evil way  
With radioactivity  
My machine comes at night  
Missiles they strike  
Save your life in the dark  
For the loud attack  
Hey! nuclear war!  
I'm really up tonight  
For my last ride  
Never returning at home  
I'm gonna die  
The war machine is not save  
And I can't escape  
When the bombs will hit  
My face, It will drive me insane
