

# Walkabouts, Straight To The Stars

don't wait any longer  
not a second more  
don't wait for the century to click  
ya' never can be sure

put my hand just where you want it  
been movin' much too slow  
move your hand just where I want it  
and don't let go

and if we let this devil ride  
I swear he's gonna take the wheel and  
drive

straight to the stars  
can't wait any longer  
straight to the stars  
the sky is only gettin' darker now

stars on the pavement  
stars in sad eyes  
stars are out for the hangin'  
true stars never die

put my hand just where you want it  
been movin' much too slow  
move your hand just where I want it  
don't let go

and if we let this devil ride  
I swear he's gonna take the wheel and  
drive

straight to the stars  
can't wait any longer  
straight to the stars  
the sky is only gettin' darker now  
only gettin' darker
