

# Wallis Bird, Slow Down

She didn't have much going on but she sang with all her might  
Then one day there came a lover that kissed her right on her heart  
That's when it happened her life began to start  
She found herself some music and things would slowly change  
Am I ignoring now the things I can't arrange?  
Then one day that same lover made her heart stop  
Guess there's only one lover can kiss you right on that spot  
Slow down the evening's just begun  
As we dance under the setting sun  
In the daylight we never have much fun  
So let's dance and celebrate the morning sun  
Once there were decisions and minutes that made  
And I'm caught in the middle I'm empty as a wave  
Everyone is leaving and soon there will be just me  
And if I have this freedom it doesn't mean I'm free  
She said  
Slow down the evening's just begun  
As we dance under the setting sun  
In the daylight we never have much fun  
So let's dance and celebrate the morning sun
