

# War of Words, Licensed Mutilation

modification? i call it mutilation  
going under the knife for this sick infatuation  
obsessed with oneself or other people's opinions  
open wallet and body to excessive incisions  
take a look at the butcher who's holding the scalpel  
making more than a living off of your insecurities  
thousands of dollars to redesign what you've been given  
dollar signs of a culture's moral immaturity  
modification or licensed mutilation?  
still keeping our society trapped in this station  
men and women convinced they need to look a certain way  
is it really worth the risk of unnecessary surgery?  
modification and further degradation  
a surgical solution to your alienation  
obsessed with oneself or other people's opinions  
open wallet and body to excessive incisions
