

Watashi-Wa, Face

I drove around this town
It looks the same as 1998
When everyday we drove around this town
Trying to find our way

How did the lights start setting on my dear
New York, New York
I'll make this loud so maybe you can hear

You know I love love love what you've got
I know know know that I'm not
The greatest brother that girl could have
Promise me you'll drive around with me soon

I drove around this town like 90
But not much is the same
Well I still pray a lot for you
I do it every day

How did the lights start setting on my dear
New York, New York
I'll make this loud so maybe you can hear

You know I love love love what you've got
I know know know that I'm not
The greatest brother that a girl could have
Promise me you'll drive around with me soon

You know I love love love what you've got
I know know know that I'm not
The greatest brother that a girl could have
Promise me you'll drive around with me soon
