

# Wavorly, Stay With Me

Is it a dream or just a nightmare?  
In your anger turn and walk away  
Quick to argue, slow to listen  
Could we try to start at the beginning?

Stay with me  
I'll never leave you here  
It takes some time to give it away  
You've got the heart that's willing to (change)

Change direction, lax affection  
Darling, what to do  
Feelings last but for the moment  
Often times can turn away the truth

In slowing down the words that steer the argument  
We find that neither side meant any word of it

And when the fight is over  
And when the dust has settled  
We find that neither side meant any word of it
