

We Are Scientists, Altered Beast

I should take my time
I should think this through
You know that not a lot of people have to talk like this
When you allow me life regrets to pass for rhetoric
Well it's not so much the words you say, it's how you use your lips

I'm sure by now you've noticed that there's no need to move
We're coming to you, yeah we're coming to you
Oh no

It's your place or mine
Just don't make me choose
You know I know you think you're saying what I want to hear
But I'm smart enough to recognise a bad idea
Your intentions are transparent, am I making myself clear?

I'm sure by now you've noticed that there's no need to move
We're coming to you, yeah we're coming to you
I'm sure by now you've noticed that there's no need to move
We're coming to you, yeah we're coming to you
I'm sure by now you've noticed that there's no need to move
We're coming to you, yeah we're coming to you
I'm sure by now you've noticed that there's no need to move
We're coming to you, yeah we're coming to you
Oh no

There's nothing wrong with asking
What am I supposed to say?
There's nothing wrong with asking
When every answer sounds the same
There's nothing wrong with asking
There's nothing wrong with asking

I'm sure by now you've noticed that there's no need to move
We're coming to you, yeah we're coming to you
I'm sure by now you've noticed that there's no need to move
We're coming to you, yeah we're coming to you
Oh no
