

# We Are Scientists, Callbacks

I guess that I should probably leave right now  
'cause I'm already kinda sweaty and freakin' out  
I gotta time-bomb headache that's sticking down  
I guess that everything is better  
when I'm not around  
It's all outta context  
There's nothing I'm into  
Call it a complex  
It's really quite simple  
I'm tired of these hang ups  
I wish someone would call me back  
How 'bout it?  
Well my tongue is hot and I'm singing songs  
I got a million only words for what you are  
I gotta plastic bag and a broken heart  
I guess everything is better wherever you are  
It's all outta context  
There's nothing I'm into  
Call it a complex  
It's really quite simple  
I'm tired of these hang ups  
I wish someone would call me back  
How 'bout it?  
It's all about context  
There's nothing I'm into  
Call it a complex  
It's really quite simple  
I'm tired of these hang ups  
I wish someone would call me back  
I said that I'm so sorry to bring you down  
I guess that everything's better  
when I'm not around  
I said that I'm so sorry to bring you down  
I guess that everything's better  
when I'm not around  
I said that I'm so sorry to bring you down  
I guess that everything's better  
when I'm not around
