

We Are Scientists, Impatience

I'm not calming down
What's this all about?
All I know is I don't need this tone you're taking

Forget what I said
For every promise kept
There's a thousand I don't even know I'm making

So it's time to stop being so impatient
It's time to stop being so impatient

Your philosophy
Is totally lost on me
With a promise I don't mean to have you waiting

That attitude
Won't do any good
When the problem's only as you, as you've made it

So it's time to stop being so impatient
It's time to stop being so impatient

Why not try to take it down?
You're gonna have to wait this out
Or tell me now
Where the fuckin' fire is

Your philosophy
Is totally lost on me
With a promise I don't mean to have you waiting

That attitude
Won't do any good
When the problem's only as you, as you've made it

So it's time to stop being so impatient
Well it's time to stop being so impatient
You're so impatient
You're so impatient
You're so impatient
