

# We Are Scientists, That One Pop Gem

I've been wasting my vacation  
Flipping through these hundred stations  
And my body's fine  
But my head's seen better days  
Well your wake was pretty boring  
Too much drinking, too much mourning  
And your uncle broke my ribs and made me cry  
Ooooh  
I don't wanna take another bow  
I don't wanna stay and hang around  
And I don't wanna tell anyone else about my life  
I don't wanna be the one who choked  
Or be the butt of all your little jokes  
I don't want you to leave me here alone, all right  
Well I pulled out all my teeth and  
Then I brought them to the beach and  
Then I threw them one by one into the sea  
And watched them sail  
I don't wanna take another bow  
I don't wanna stay and hang around  
And I don't wanna tell anyone else about my life  
I don't wanna be the one who choked  
Or be the butt of all your little jokes  
I don't want you to leave me here alone, all right  
Well I was having much more fun  
When I thought we were alive  
I don't wanna take another bow  
I don't wanna stay and hang around  
And I don't wanna tell anyone else about my life  
I don't wanna be the one who chokes  
Or be the butt of all your little jokes  
I don't want you to leave me here alone, all right  
All right  
Oh oh oh oh  
All right
