

We Shot The Moon, Faces

Live it up, let it go
Just hand over control
All the space and all the time
Yea it all just passed you by

You've been so many places (woah)
And I know the feel of wearing different faces (woah)

And if you slow down
Could it ever be this fun?
In a small town
With no where else to run
Give it time, figure it out
Get in line, and narrow it down
You'd go farther then you ever thought you could

And have you noticed this before
That you never close the door
Always keep them on the line
Save it for another time

You've been so many places (woah)
And I know the feel of wearing different faces (woah)

And if you slow down
Could it ever be this fun?
In a small town
With no where else to run
Give it time, figure it out
Get in line, and narrow it down
You'd go farther then you ever thought you could

I try to make us believe
The lies, the lies that you were doing everything you could

You've got a lot to change
It's not too late
You've got to bring it to the light
And find the good

You've been so many places
You've been so many places

And if you slow down
Could it ever be this fun?
In a small town
With no where else to run
Give it time, figure it out
Get in line, and narrow it down
You'd go farther then you ever thought you could
(Youve been so many places)

Farther then you ever thought you could (youve been so many places)
Farther then you ever thought you could (youve been so many places)
Farther then you ever thought you could
