

# Wednesday 13, Elect Death For President

Raise your wrist up in the air  
And wave your razorblades like you just don't care  
Use your voice, make homicide your choice

Politics coming straight from the crypt  
Stirring up the world with its ugly stick  
Put your faith in a shallow grave today

Red, yellow, black or white  
It doesn't matter -- everyone dies tonight

Elect death, death for president  
Elect death, death for president  
Elect death, death for president  
Elect death

Hooray for homicide  
My left wing's baked and my right wing's fried  
Vote for me and I'll legalize everything

Splish splash you're in a blood bath  
Intentionally headed down the wrong path  
But a dollar sign won't make you smile in your grave

Red, yellow, black or white  
It doesn't matter -- everyone dies tonight

Elect death, death for president  
Elect death, death for president  
Elect death, death for president  
Elect death

I'm on your side!

Elect death, death for president  
Elect death, death for president  
Elect death, death for president  
Elect death

Vote for me!

Red, yellow, black or white  
It doesn't matter -- everyone dies tonight

Elect death, death for president  
Elect death, death for president  
Elect death, death for president  
Elect death

Trust in me

Elect death, death for president  
Elect death, death for president  
Elect death, death for president  
Elect death
