

Weezer, The Christmas Song (Remix)

You told me you would be here by my side
Warming my heart on this cold winter's night
Here I sit waiting beside the tree all by myself (by myself)

You told me you would move heaven and earth
Cheering my spirits with laughter and mirth
Here I sit waiting beside the tree all by myself (by myself)

Oh, could you ever know how much I care?
Could you ever know that out somewhere
There's a boy who really hurts?

Since I've found you
I've found a girl
I've found a thorn
I've found a queen
Now I am warm

Oh, could you ever know how much I care?
Could you ever know that out somewhere
There's a boy who really hurts?

Since I've found you
I've found a girl
I've found a thorn
I've found a queen
Now I am warm

You told me you would move heaven and earth
Cheering my spirits with laughter and mirth
Here I sit waiting beside the tree all by myself (by myself)
Here I sit waiting beside the tree all by myself
