

Wendy And Lisa, Everyday

Everyday the sun comes up
I got no one I that can trust
How can I face another day
Without the love each night I pray for

Everyday, everyday, everyday
Everyday I want you more

Everyday I call you up
You're not there to pick it up
I'm the one who wishes everynight
Upon a star, a star so very bright

Everyday, everyday, everyday
Everyday I want you more

My body's beggin' baby for your touch
I never needed anything so much
I know you want me baby, don't make me act
So crazy (I've been) loving you, breathing you
Being you my whole life

Everyday, everyday, everyday
Everyday I want you more

Sad is everyday you walk away
Waiting for the day you look my way
For the love of you each night I pray
Sad is everyday
