

West Avenue, Julia

Everybody knows her name
But they don't know how I can do
I see her every single day
Always running ... for school

Light me strikes every time we meet
She plus me is perfect chemistry
This must be something is meant to be
something is meant to be

Julia's makes my heart sing
Every time we're touchi'
Julia makes my world spin around

All this time I've been searching For someone
Julia makes my world spin around

She is singing with some else
But he got nothing to me
Coz I can take her anywhere
Anywhere she wanna be

Light me strikes every time we meet
She plus me is perfect chemistry
This must be something is meant to be
something is meant to be

Julia's makes my heart sing
Every time we're touchi'
Julia makes my world spin around

All this time I've been searching For someone
Julia makes my world spin around

Heart to heart
Than we are live
Hand in hand
And we don't mind that crowd
Taxi came
And we wave goodbye
But I know for sure
One day she will be mine

Julia's makes my heart sing

Julia's makes my heart sing
Every time we're touchi'
Julia makes my world spin around

All this time I've been searching For someone
Julia makes my world spin around
