

# When September, September All Over

Ooaa, aaaa

She never loved you, she was only passing time  
She never knew you, you were just a running down??  
This is how it goes, you end up on the ground  
But you can't slow down, but you can't slow down,  
but you can't slow down

CHORUS:

I'll be waiting  
When there's nothing left to say  
And you're beginning to fade away  
You'll get september all over again  
I'll be waiting  
When there's nothing left to say  
And you're beginning to fade away  
You'll get september all over again  
September all over again  
September all over again

It better rain today, your river's running dry  
You need a sun to fill the black hole in the sky  
You never win no matter how you try  
But you can't slow down, but you can't slow down,  
but you can't slow down

CHORUS

September all over again

She never loved you, she was passing time  
She never knew you, you were just a run

CHORUS
