

# White Town, I'm Alone

Stay with me till the clouds are gone  
Understand you're the only one  
I feel your closeness like a missing key  
You've got me all over you  
You're all over me

I'm alone

In the lay by we wait for cars to pass  
In the sunshine we always wait for dark

In the classroom you avoid my eyes  
When you kiss me I can't hear you lie

I'm alone

Her face is fading it will soon be gone  
But there's part of me that will never move on  
Her words are falling through the sky like snow  
I hear them calling now it's time to go
