

Why Don't We, Slow Down

I've been lying to myself
And i might know why
I miss the way you looked at me
Before you left New York

I've been trying to find help
Because i can't deny
The way that i feel
When i am with you
I'd do anything to save you

I think we need a little Californication
We took a shot at this
But wayne we're too wasted
It's hard to swallow but
I know we gotta chase it

Slow down i think we just need to slow down
Slow down
Turn around
Things were so simple way before now
