

Wide Mouth Mason, Come Out To Go

You've been doing what you used to do
Go the places that it took you to
Thinking over all the things you knew
That you know you don't know now

And you wonder what you're on about
Who's the loser talking out your mouth
He's making like he figured it out
When you know he don't know how

Light in inside
Take it outside
Light it inside
Take it outside
But if you're gonna come
You gotta leave now
Because we come out to go

Lose it inside
Find it outside
Lose it inside
Find it outside
But if you're gonna come
You gotta leave now
Because we come out
We come out to go

You've been seeing who you used to see
Been the person that you used to be
You're delivering a eulogy
For the things you're cutting out

You've been a sucker for the last time
You saw it coming but you held the line
You've been slipping on a road of ice
And you're spun out upside down

Light in inside
Take it outside
Light it inside
Take it outside
But if you're gonna come
You gotta leave now
Because we come out to go

Lose it inside
Find it outside
Lose it inside
Find it outside
But if you're gonna come
You gotta leave now
Because we come out
We come out to go

You're building up to it
Let's go and do it
We'll make it out alright
We'll catch a new ride

Here it comes
Here it comes
Get a grip on it

Here it comes

Here it comes
Let go of it

Here it comes
Here it comes
Here it comes
You better not look down
