

Wilburn Brothers, Young But True Love

Young but true love my love for you love constant and deep in my heart
And there's no denying two hearts will be dying if we let them keep us apart
And waitin' will link them the time that could string them
A love that means our happiness
For there's none more fewer and there's none more surer
Than young but true love that is ours
(ac.guitar)
And if dreams we've started leave us broken hearted together we'll share all the tears
Just two young they'll flame it but we'll never blame it
On young but true love that is ours
