

Will Hoge, Carousel

see her walking alone in this city of heartache and stone
she finds her way down to where she once found all her dreams she doesn't understand
why something she'd given her heart to could die but that's just the way it works out they say it's all

(chorus) she's coming back down
this carousel ride has stopped spinning round
she wants to say she's sorry and stay but it's too late
now this carousel ride has shut down

fingertips trace the lines pens and papers recall the good times but clocks they do run and change

(chorus)

(bridge)

and i want you to come with me tonight
i don't know if it's real but it surely feels right

(chorus)
