

# Will Wakefield, If You Ever Go To Mars

And if you ever go to Mars  
could you say hello for me  
And when your travelin' through the stars  
would you wave goodbye to me

I wish I could follow you someday  
I wish I could up and fly away  
but I probably won't do that  
I just hope that you'll come back

And if you ever go to Mars  
Ask them what they think of cars  
I know that a spaceship travels far  
but I think I'd settle for a car

With a car I could come and find you  
With a car I could attempt a rescue  
but who am I kidding anyway  
You chose to go away

And if you ever go to Mars  
could you say hello for me  
And when your travelin' through the stars  
would you wave goodbye to me □ I wish I could follow you someday  
I wish I could up and fly away  
but now I no I won't do that  
and now I know that you aren't coming back

But if I ever go to mars  
I'll visit your favorite Martian bar  
And I'll buy drinks for all your friends  
maybe I'll get to see you again

I'll be content just knowing your there  
When I go home, I'll feel better, I swear  
I'm sorry I couldn't be there for you  
You know I loved you too...
