

# Willow Smith, Heart

Inside your mind I converse with your star self  
And tell me why I'm here right now, hidden in a cloud  
I'm hydrogen, atoms fled me up  
And mess up your planet  
Mess up your planet just like the graze  
Just like the martians, just like a garden  
Just like I remember  
Star kids and now I'm sitting here  
Now I'm passing a lightyear  
Inside my sphere, yes in my planet  
Inside my heart, I will just plant it the seed of knowledge  
I said, I got this  
I don't think it's fair that you're on Earth and I'm up up here  
Making stars and galaxies and comets  
Making a life on other dimensions  
I don't think it's fair that you're on Earth and I'm up here  
Making stars and galaxies and planets  
Making a life on other dimensions
