

# Wilshire, Closer Still

I woke up this morning  
To face another day  
The sun wasn't shining in this world that I had made  
I looked to the mirror to see what I'd become  
And somehow I knew that part of me was gone  
I looked and looked and couldn't find  
Something to fill this heart of mine  
And all that I could do  
Is think of you

Chorus

The further I get from me, closer to you I believe  
I want to be closer still, where you are, what you will

I'm tired of chasing temporary things  
The short-lived satisfaction my foolishness can bring  
I feel it's coming down to this  
I think it's time to take a risk  
I know just what to do  
I'll make my way to you

Chorus:

The further I get from me closer to you I believe  
I want to be closer still, where you are, what you will

(Chorus)
