

Winter, Eternal Frost

The place where all frozen still
Upon the body laid still
Extracted by sorcery
Once there was a myth

Rivers of fear run cold
Ice castle formation
Frozen tears escape eternal frost

Hope and desire fade
Fury in the emperor's eyes
Cast here for eternity
Season of the damned

Rivers of fear run cold
Ice castle formation
Frozen tears escape eternal frost

{The demo/EP version of this song has some extra lyrics at this point in the song.}

Forbidden land of sorrow
At last the winter winds sing
Scattered ashes of kings
Gaze at the fallen walls

Rivers of fear run cold
Ice castle formation
Frozen tears escape eternal frost
