

# Witchdoctor, Remedy

(feat. Big Rube)

[Big Bube]

Back to the frontline, resurrected this old skool shit  
Cause niggas still respect it, it's all cool shit  
Kinda tight so I select it to flow on  
So unexpected and so on, but damn that  
I wanna take a minute tram back with the mainstream  
Playing field where the main team kill bodies  
And wannabe John Gottis shoulda been Zulu  
But who knew but too few in my crew  
And the rest didn't listen now some of the best is missing  
Some of the rest is dissing, some of your chest is missing  
Some of your views is changing, but none of your time remaining  
It's a goddam shame a lot of fake niggas claim heaven sent  
But me, I'm hell bent on destruction of the mass constructions  
Of the mass destruction, of my ass restructuring  
Of the past reflecting off the last injection  
This cause and effect is known as infection  
Made it known being prone to our own demise is imminent  
I sure hope we leave a remnant
